Education

University at Buffalo

Buffalo, NY

Bachelor of Science in Industrial Engineering

Expected May 2027

Dean's List: Spring 2025, Fall 2025, Spring 2026 **GPA: 3.4/4.0**

Relevant Coursework: Facility Design & Material Handling, Production & Service Systems, Quality Assurance, Engineering Statistics, Optimization, Human Factors, Analytics & Computing

Industry Experience

FlowSafe, Inc. (Dresser Utility Solutions)

Orchard Park, NY

Industrial Engineering Intern

May 2026 – Present

- Developed a connected pressure-testing and reporting system using Raspberry Pi operator stations, live pressure capture, guided workflows, centralized records, and management dashboards; identified approximately 1,453 recoverable labor-hours annually.
- Analyzed two years of production flow across 104 activity locations and 10,816 origin-destination paths in AutoCAD; proposed a future-state layout reducing modeled transportation effort by 18.75%.
- Built a Python-based Valve Decoder that transformed 19,567 historical shipped-valve records covering 1,951 unique models into a structured, searchable engineering reference tool.
- Evaluated assembly tooling and operator workflows across six assemblers, identified recurring motion and tool-access losses, and developed a standardized tooling proposal to reduce non-value-added time.

Best Buy – Geek Squad

Buffalo, NY

Advanced Repair Agent

September 2023 – Present

- Diagnose and repair computers and consumer electronics while managing concurrent service orders, technical documentation, data protection requirements, and customer communication in a high-volume service environment.
- Trained approximately 10 employees on diagnostic procedures and repair workflows while contributing process improvements associated with a 33% increase in precinct efficiency.
- Translate complex technical findings into clear repair recommendations, coordinate parts and service actions, and prioritize workload to meet turnaround and quality expectations.

Projects and Leadership

Pharmacy Facility Layout & Process Design

2026

- Developed and compared facility-layout alternatives using flow, distance, space, relationship charts, and operational requirements to improve movement through a pharmacy production/service system.
- Applied systematic layout planning and quantitative evaluation methods to balance material flow, adjacency needs, capacity, and practical operating constraints.

ADA-Compliant Pool Lift Design

2024

- Designed an ADA-compliant pool lift capable of supporting up to 300 lb, using SolidWorks and engineering calculations to develop the mechanical concept and supporting drawings.
- Calculated linkage geometry, joint positions, counterweight placement, and volume to prevent hydraulic overextension and maintain stability throughout the operating range.

PlayStation 5 DualSense Human Factors Evaluation

2026

- Evaluated grip geometry, control placement, anthropometry, accessibility, and prolonged-use comfort; developed recommendations to improve ergonomic fit across a broader user population.

Boy Scouts of America – Eagle Scout / Senior Patrol Leader

2024

- Led troop activities, delegated responsibilities, coordinated scouts and adult leaders, and managed planning for service and outdoor programs while progressing to the Eagle Scout rank.

Honors and Awards

Eagle Scout – Boy Scouts of America December 2024

International Baccalaureate Diploma Recipient June 2023

Skills

Software & Data: AutoCAD, SolidWorks, Python, R, Minitab, Microsoft Excel, MATLAB, dashboard development, database design, data visualization

Industrial Engineering: Facility layout, material handling, process mapping, Lean, time study, statistics, optimization, simulation, quality assurance, human factors

Systems & Prototyping: Raspberry Pi, engineering drawings, 3D printing, data cleaning, process improvement, technical troubleshooting

Professional: Technical documentation, cross-functional communication, training, customer communication, project coordination
